Project Overview

Get a clear Meetrapport for Funda. We use NEN 2580 and BBMI to make sure your data is 100% right. Build trust and show the true value of your home today.

What We Delivered

- ✓ Standard-Compliant Reports: Every report meets BBMI and NEN 2580 requirements for the Dutch market.
- ✓ Professional Floor Plans: High-quality 2D or 3D maps that match the measurement data.
- ✓ Ready-to-Use Files: High-resolution digital reports that are ready to upload to Funda immediately.
- ✓ Clear Measurement Statements: An easy-to-read document that lists the exact size of the home.
- ✓ Accurate Surface Drawings: Visual proof of how the square meters were calculated.

How We Delivered It

- 1 Requirements Gathering**

We start by understanding your specific needs, project scope, and goals to ensure total alignment from day one.
- 2 Digital Processing**

Using industry-leading tools, we accurately map and translate your physical layouts into precise digital frameworks.
- 3 Quality Control**

Our experts conduct rigorous reviews of all digitized assets to ensure strict adherence to measurements and standards.
- 4 Approval & Delivery**

Upon your final sign-off, we package and deliver the completed, high-quality digital assets ready for deployment.

FAQ

Why is BBMI / NEN2580 important?

It ensures accurate and standardized measurements for buyers, sellers, and real estate agents. Using NEN2580 helps prevent disputes over property size in the Dutch market.

How long does it take to prepare a BBMI / NEN2580 report?

It usually takes 1 business day, depending on the size and complexity of the property.

What is BBMI / NEN2580?

NEN2580 is a Dutch standard for measuring property size. It defines how to calculate floor area, volume, and usable space. BBMI (Building Measurement & Information) uses this standard to provide accurate property reports.

Do you follow international standards?

Yes. We prepare floor plans based on NEN 2580 standards and also follow local rules if requested.

Why Dream Chaser Nepal
